We are a worldwide operating engineering company organised in three business units in Germany and 10 foreign entities/ international subsidiaries. With more than 2,600 employees worldwide and a broad network of sales offices and sales representatives ThyssenKrupp Fördertechnik has successfully executed projects in all parts of the world. The engineering experience and know-how enable the company to design, supply and assemble individual machines and systems as well as complete major projects specially customised to the requirements of the customers. The company offers a wide range of plants and equipment for open pit mining, mineral processing and bulk materials handling - from planning, design, engineering, fabrication and commissioning, right up to after-sales services.
